AVermedia launches a video conferencing range, the AVerComm H series. The 2 models offer 720P images at 30fps and are aimed at business and education.

The AVerComm H100 has a 5 megapixel PTZ camera, two-way content sharing and projector-applicable Table Hub design.

The AVerComm H300 allows 4-way Multipoint conferencing, snapshot and meeting recording added to the H100's features. AVerMedia says it is designed for headquarter and boardroom use.
