Audience reveals what it describes as its best speaker yet-- an upgrade of the ClairAudient 16+16 the company calls a "full-range," one-way bi-pole (front and rear radiating) loudspeaker.

The speaker carries eight 6x9-inch aluminium-frame custom passive radiators and the company's 2nd generation 3-inch A3-S2 drivers.

It has a range of 30Hz to 22kHz, while the previous 16+16 was flat down to 80Hz and required the augmentation of a subwoofer.

The new 16+16 is available now in a choice of exotic wood finishes.
