---

Genelec introduces the SpeakerAngle app for iOS devices, a digital tool which allows anyone to correctly set and match the angling ("toe-in") of both stereo and 7.1 surround sound speakers.

Easy and intuitive to use, SpeakerAngle was co-developed by Genelec and AudioApps (a new mobile apps company) and is compatible with iPhone 4 and later, iPad 2 and later and iPhone Touch 4th Generation and later.

SpeakerAngle is available at the iTunes App Store at a price of just 99 cents.

Go [Genelec, see iTunes for the App](#)
