Terra Loudspeakers supplies Leon Speakers with CS-5.25 woofer/mid-range drivers for the Boundary 404-- the first weather-resistant outdoor speaker from Leon.

The Boundary 404 features two 4" outdoor aluminium cone woofers and a 1" aluminium/magnesium dome. According to Leon each speaker is custom built from hand-selected mahogany and finished with the exact varnish as classic ship hulls.

The weather-proof enclosure is available in either mahogany, black or white wood and has polished chrome top and bottom tails.

Performance specs include 60W at 4 ohms and a frequency response of 65-20kHz at 89dB@1W/1m.
