Designed to work with the Crown amplifier, the SnapAV Episode Landscape series speakers include tree-mount, ground-mount and surface-mount designs all compatible with either 70V/100V or 8-ohm distributed audio systems.

A rotary tap switch allows changes between with 3.7, 7.5, 15 and 30W settings.

The speakers are available either individually or as a set of 4 or 6 packaged with the Crown amplifier and burial-grade subwoofer with a 12-inch woofer.

SnapAV says the speakers offer 100-degrees of coverage, allowing one to place each one 7.5-9m apart to blanket an entire space.

When it comes to temperatures according to the company the speakers should handle conditions ranging from -30 to 85 degrees Celsius.

The package also includes 1m of burial-rated 16/2 cable and silicone-filled waterproof wire nuts.
