Hansong Technology announces two new products-- an entry-level HDMI adapter for the transmission of HD surround sound and an audio hub transmitting wireless HD audio from multiple input sources for home theatre systems.

The adapter provides basic connectivity via HDMI port connected to an HDTV for transmitting wireless HD audio to WiSA-compliant speaker. It also features Bluetooth connectivity for wireless streaming and setup.

Meanwhile the wireless hub provides multiple connectivity options and audio decoding via HDMI, SPDIF, DLNA and Bluetooth from multiple content sources including Blu-ray players, HDTVs, STBs, consoles and mobile devices.
