Customers demanding a glowing musical shower solution might be interested in the Shower Speaker, a speaker-equipped showerhead equipped with LED light sensors for the "ultimate shower experience."

Unlike other musical showerheads (such as the Kohler Moxie) the Shower Speaker features an LED ring with lights changing colour from blue to magenta and red according to the water temperature.

On the audio side it carries a removable 3W Bluetooth 3.0 + EDR speaker the maker promise provides up to 15 hours of music or talk on a single charge, with "outstanding" RF amplification and dual-microphone noise reduction.

Meanwhile the shower hardware features stainless steel contraction and easy plug-and-play installation.

For the curious the Shower Speaker is currently available on a preorder basis on the Indiegogo crowdfunding platform.
