Denon launches a smaller version of the Envaya portable Bluetooth speaker-- the Envaya Mini DSB-100, a similarly portable number featuring aptX Bluetooth and NFC connectivity.

Inside the more compact are 40mm full range drivers and a 40 x 83mm passive radiator, together with a battery Denon claims powers up to 10 hours of use and a noise-canceling speakerphone. Users can place it in either horizontal or vertical positions, and it also features water resistance.

The Mini DSB-100 is available now in either black finish with a blue cloth grille or in white with an orange cloth grille.
