

KEF Presents CiCi5160REF-THX Loudspeaker

Written by Marco Attard
14. 09. 2016

KEF presents an addition to the Extreme Home Theatre THX Ci custom install speaker series--the Ci5160REF-THX, featuring four linear 165mm bass drivers and a 125mm MF/HF Uni-Q array.

Aimed at the high-end market, the in-ceiling loudspeaker also features a 25mm vented aluminium dome tweeter at the acoustic centre, and is finished with a "massive" brushed 11mm thick aluminium front baffle. It is designed to be part of the Reference series, and is THX Ultra 2 certified.

Connectivity comes through both bi-wire and bi-amplifier options, delivering on the performance promise of all KEF R series speakers.

The Ci5160REF-THX is available from December 2016.
