Vizio, the 3rd biggest TV vendor in the US, arrives in Europe with the UK launch of the SB362An, a low-cost soundbar featuring a pair of 2.25-inch full-range drivers and integrated 3-inch subwoofer.

Launched in the US back in 2018, the SB362An promises to be "supremely flexible," with connectivity options including 3.5mm analogue, digital optical (Toslink) input, Bluetooth and a USB port. It also features multiple configurations allowing use in any space, be it in a large living room or a bedroom.

The soundbar also features DTS Virtual:X technology, allowing for object-based audio support. On the installation side customers can rotate it for multiple mounting configurations.

The SB362An is available now.
