CEDIA Expo 2016 sees Barco Residential team up with key home theatre partners to demonstrate a range of residential solutions, combining flagship technology with architectural and interior design.

A "Cinema-at-Home" demo involves Thor, the top-of-the-line 4K "mega projector" featuring "true" 6P 3D direct laser technology, with the new Barco Alchemy server, an Auro-3D 11.1 system from Steinway Lyngdorf and a Stewart Filmscreen Director's Choice screen configured with the company's StudioTek 100 unity gain reference screen material.

Another company teaming up with Barco is Meridian Audio, who provides the G65 high-performance surround controller as paired with the Meridian DSP7200SE floor-standing loudspeakers.

"Together with leading cinema companies like Stewart Filmscreen, Steinway Lyngdorf and Meridian Audio, Barco is setting a new trend embodying more customised and architecturally integrated video solutions that go above and beyond what any mass-produced home theater solution can provide," the company says. "The combination of these best-in-class solutions allows us to offer home theater enthusiasts a complete movie theater-like experience in their very own home."

In addition the Barco CEDIA stand shows off the Loki, a 4K projector featuring a dual laser light engine, award-winning DLP technology and world class optics, as well as the Wodan 4K projector complete with "completely new processing electronics, new connectivity and even more powerful built-in warp."

Barco Showcases Ultimate Home Cinema at CEDIA
