

Netflix Officially Official in UK, Ireland

Written by Marco Attard
10. 01. 2012

It has been a long time coming-- Netflix is now available in the UK and Ireland, with a catalog of video-on-demand content for PCs, tablets and mobile devices.

Supported devices include PCs, game consoles, LG internet-enabled Blu-ray players, iOS devices, Samsung Smart TVs, Philips, WD and Roku STBs and Android devices. Content comes from sources such as All3Media, the BBC, CBS, Channel 4's 4oD, Disney UK & Ireland, ITV, Lionsgate UK, MGM, Miramax, Momentum Pictures, NBCUniversal, Paramount, Sony Pictures Entertainment, Twentieth Century Fox and Viacom International Media Networks.

Users can also integrate Netflix accounts with Facebook, making it easier to show off exactly what they're watching.

The service is available now for the price of £5.99/€6.99 monthly. Now one only wonders when the service will be available for the rest of the continent...
