

Gefen's Matrix Switcher

Written by Bob Snyder
03. 06. 2008

Gefen's 4x4 DVI DL Matrix enables a direct connection of 4 computers to 4 displays with support for dual link DVI resolutions up to 3840x2400. Users assign a computer to a display using the IR remote (or RS-232 connection).

A 24-volt external power supply drives performance with an instant delivery of dual link DVI video to the selected display.
