

Zigen Announces HDMI Extender

Written by Marco Attard
27. 08. 2013

Zigen starts shipping the ZIG-CX-100-- a transmitter/receiver set allowing for HDMI signal transmission over single RG-6 quad coaxial cable with 3D pass-through.

The kit features a built-in bi-directional IR and RS232 control signal pathway one can pass over the same coaxial cable.

It transmits signals up to 1080/24Hz with 3D for up to 100m, and is compliant with HDMI 1.4, 3D, HDCP and DVI-D standards.
