

DVDO Intros 4K HDMI Matrix

Written by Marco Attard
23. 09. 2013

DVDO launches the Matrix6-- a 6-input by 2-output HDMI matrix switcher capable of routing resolutions of up to 4K (4096x2160) ideal for both residential and commercial AV applications.

Two of the inputs are MHL-HDMI ports, while two digital (S/PDIF optical and coax outputs) audio ports are included for connectivity to external soundbars in addition to audio embedded in the HDMI ports.

Further more the switcher provides RS232, IR and USB control.

The Matrix6 should be available from Q4 2013.
