Australian connectivity solution vendor Kordz forms a partnership with distributor HD Connectivity selling Kordz products in the UK, including the recently announced NEO-S3 HDMI extender.

"This is a natural collaboration between two like-minded companies dedicated to offering the highest quality HDMI solutions" Kordz managing director David Meyer says. "Both Kordz and HD Connectivity believe that great products come from solid understanding of HDMI."

Launched at CEDIA Expo 2013, the NEO-S3 upgrades existing HDMI installations to the 4K/UHD capability while extending installations by either 20m (1080p/60) or 30m (4K). It also uses thinner, more flexible cables and reduces mounting dept at both ends to 25mm.

Other Kordz products include high-performance HDMI cables, extenders (Catx and HDBaseT) and splitters.
