Just Add Power (J+P) announces the rackmount version of the 3G Ultra HD Over IP Power over Ethernet (PoE) transmitter, allowing installers to mix and match J+P devices to fit project hardware and budget requirements.

The J+P 1RU rackmount VBS-HDIP-747 3G Ultra HD (4K@30Hz 4:2:0) over IP PoE transmitter provides the same features as the VBS-HDMI-707 PoE TX, as both models distribute 4K video with HDR via JPEG2000 over IP, and support HDCP 2.2, 4K to 1080p scaling, two-way RS232 and IP control and all audio formats up to and including Dolby Atmos and DTS:X.

The 3G Ultra HD over IP models use the same gigabit network, providing a scalable systems approach to 4K video signal distribution. The line includes the VBS-HDMI-717HIFI PoE TX, VBS-HDMI-718AVP PoE TX and rackmount VBS-HDMI-749AVP TX. The 718AVP and 749AVP distribute UHD and 4K video to every zone over a single Cat-5e cable along with Dolby Digital 5.1 audio, and transform the signals to stereo audio for 2-channel zones.
