HDanywhere refreshes the mHub matrix lineup with the addition of two new 8x8 and 4x4 matrixes, including 4K UHD and HDCP 2.2-capable modles complete with matrixed audio extraction and "dependable" source switching.

Another addition is the "gateway to multiroom" 1x4 mHub 2K HDMI with over Cat splitter with local HDMI out.

The company says it has an mHub for suiting every requirement, with the lineup divided in 2 subgroups-- the entry-level mHub 2K HD 1080p video distribution products and the more advanced mHub 4K range of HDBaseT-Pro (Class A) matrixes with ethernet, PoH, HDCP 2.2 support, multichannel audio extraction and stereo extraction at the hub.

Each product is an "everything-in-the-box" system promising simple installation and dependable switching performance for the customer.

mHub 2K products, including the mHub 2K 8x8, are avaialable now. mHub 4K products with HDCP 2.2 support should hit the market by October 2015.
