Trendnet releases a 500Mbps powerline AV adapter (model TPL-401E) and adapter kit (TPL-401E2K).

TPL-401E

The company describes the adapter as the fastest powerline solution available today.

One adapter connects to the router and the other to any electrical outlet for instant network access.

The TPL-401E2K adapter kit includes x2 powerline AV adapters.

Up to 16 powerline adapters can be used together to network devices without the need for new cabling.
