Luxaflex announces the PowerView Hub 2 is compatible with Apple HomeKit, allowing customers to control the blinds with an iPhone or iPad, as well as the PowerView Pebble remote.

The capability comes through a downloadable update for the PowerView Hub 2. The blinds can be securely controlled using Apple Home app and Siri on the iPhone, iPad, Apple Watch, Mac and HomePod. Amazon Alexa and Google Home control are also available.

Once the PowerView system is installed, homeowners need to enable HomeKit directly from the PowerView app to be able to control the blinds using voice control through any HomeKit-enabled device or accessory.
