

New Control and Automation Solutions from Crestron

Written by Bob Snyder
12. 10. 2012

Crestron will showcase a range of new products and solutions at InfoComm MEA: from the TSW-750 touch panel, CLWI in-wall dimmers and energy efficient CLED LED fixtures, to Capture HD and the latest additions to the DigitalMedia product line.

Products on show include:

TSW-750: A space-saving, surface mount touch screen featuring a clean, contemporary appearance with edge-to-edge glass and Core 3 UI™ graphics. Additional features include high-performance H.264 video, Rava™ SIP Intercom, and standard gang-box installation.

DigitalMedia Presentation System (DMPS): The next generation of MPS Multimedia Presentation System, DMPS offers an HD presentation control and signal routing solution.

Capture-HD: For university campuses and corporate enterprises, CAPTURE-HD provides staff/presenters with a one-button solution to schedule, record, publish online and view lectures, presentations, medical procedures and seminars.

New Control and Automation Solutions from Crestron
