Remote Technologies Incorporated (RTI) starts shipping the KX2 in-wall controller, a handheld controller aimed for both residential and commercial applications.

It features IR, ethernet (PoE) and 2-way control together with a 2.8-inch 320x240 colour LCD display complete with customisable interface and 12 custom-engravable hard buttons.

The control interface is configurable via RTI Integration Designer and is capable of managing the hard buttons with macro functions.
