HDMI Forum releases the Compliance Test Specification (CTS) for Version 2.0 of the HDMI Specification, the document by which Adopters can ensure that their 2.0-enabled HDMI products are compliant with Version 2.0 of the HDMI Specification.

Launched late in 2013, Version 2.0 of the HDMI Specification offers a significant increase in bandwidth (up to 18Gbps) to support new features such as 4K@50/60 (2160p), which is 4X the clarity of 1080p/60 video resolution; 32 audio channels; as well as dynamic auto lip-sync and extensions to CEC. Version 2.0 is backward compatible with earlier versions of the HDMI Specification.

The 2.0 CTS and the HDMI 2.0 Specification are available for download by licensed HDMI Adopters who have signed the 2.0 Addendum to the HDMI Adopter Agreement. Both documents can be found on the HDMI Adopter Extranet.

There are 12 Authorized Test Centers (ATCs) worldwide where licensed manufacturers can submit their products for compliance testing. In Europe it's in France: [Presto Engineering](#).
