We caught a very good article on **The Ten iPad Apps for AV Managers** in *AV Technology* but that later seemed dull compared to the hairball that *You Tube* coughed up this week.

Shown in the photo, you'll see a cat that developed a fondness for interacting with its owner's iPad. The cat is clearly an Apple fanboy but what really struck us what how YouTube is filling up with **My-Cat-Loves-iPad** videos.

Hundreds!

Unfortunately for Apple, the fact that cats have no money to buy their own iPads means that the feline market is for the dogs. (Hey, what about the dogs? Are they iPad lovers, too?)
