Sitting around was just part of CeBIT business for AC Ryan....the company shows off their product focus on Full HD network media players and recorders at CeBIT. Their Playon! and FLUXX series completed a living room scene in Hall 14.

AC Ryan says Fluxx is "the first Full HD media player to ship with Intel's Atom CE4150 processor." With 1.2GHz processing, 400MHz graphics and 1GB DDR3 memory, 2GB NAND-flash, AC Ryan offers models with up to 2TV at mass market prices.

Comes with Gigabit Wired Network and optional wireless_N via USB.
