Sanus ships the VMF322 Super Slim full-motion wall mount-- with a profile depth of just 3.5cm from the wall, it extends up to 56cm and allows full-motion capabilities.

Fingertip tilt technology provides easy TV angle adjustments, while an integrated cable management system keeps loose cables organised within the extension arm. Post-installation leveling adjustments ensure perfect TV positioning.

It is ideal for flat panel TVs measuring 26- to 47-inches and holds weights of up to 27.27kg.

Single-stud mounting simplifies installation, and Sanus even offers optional decorative covers for customers who want to hide mounting hardware.
