Sanus ships the VMT32 tilting wall mount-- a CEDIA Expo 2012 introduction ideal for 26- to 40-inch TVs weighing up to 36.36kg.

Modeled after the popular VMPL50A, the VMT35 can be installed to single as well as double studs.

Features include Virtual Axis (provides smooth tilt with the touch of a finger), ProSet height and level adjustments (allowing perfect TV positioning after hanging), quick-snap TV brackets and a rail design allowing installers to shift the TV left and right, even with off-centre studs.
