Sanus launches the BFV53 Audio Video Stand-- a high performance stand with a unique design ideal for multiple components and flat-panel TVs up to 56-inch in size.

The open design allows for maximum airflow to equipment while providing easy access to the back of components and generous cable management holes.

Construction is in thick smoked tempered glass on powder coated heavy gauge steel with adjustable feet.

The BFV53 is compatible with the ELM701 flat-panel TV anti-tip strap and the FMS for a pillar-mounted solution.
