Sanus now ships one of the largest iPad mount lines we've seen yet-- one complete with mounts attaching to walls, beneath cabinets, any flat surface or any metal (via magnet).

The line has 4 different models. These are the VTM1 (for desk, under-cabinet, on-wall or magnetic surface mounting), VTM5 (desk, under-cabinet or magnetic surface), VTM6 (on-wall or magnetic surface) and the VTM7 (magnet surface mounting).

All the mounts are compatible with the iPad 2 and 3rd generation iPad, with a magnetic case and Sanus "MagFit" technology ensuring the tablet is safely secured.
