The 2012 LG Smart TV with Google TV (G2 Series) lineup gets a couple of updates-- the latest Google TV version and access to the OnLive cloud gaming application.

New Google TV features include voice search, allowing users to bark out orders like "Breaking Bad!" to the LG Magic Remote microphone. The TV & Movies app gets a name change to "Google TV PrimeTime" and a choice of over 100000 movies and TV shows via content sources such as live TV, Netflix, Amazon Instant Video and HBO Go.

Customers can also automatically pair Android mobile devices to LG G2 TVs via wifi, allowing the streaming of YouTube content from smartphone or tablet on the TV.

Meanwhile the OnLive app provides access (via either demo, purchase or rental) to around 200 games over the cloud, without the need for an additional console.
