Sanus combines the "simple and functional elegance" of Scandinavian design with the needs of high-performance AV systems with the Cadenza Collection media furniture line.

The collection currently consists of Cadenza75 and 61 flat panel media consoles and the Cadenza53 AV media cabinet. All feature wood rack mount shelves, hidden rack rails for smaller components and built-in cable management channels, with built-in ventilation on each internal shelf and removable back panel.

Installers can also add cooling fans for further temperature regulation.

The Cadenza75 accommodates flat panel TVs up to 80-inch or 68kg in size, together with an extra-large centre channel speaker opening allowing for soundbars or LCRs up to 73-inch wide. The Cadenza61 is the smaller option designed for 70-inch (68kg) TVs and soundbars or LCRs up to 59-inch wide.

Meanwhile the Cadenza53 is a 26RU (11RU bottom, 15RU top) cabinet with 3 adjustable shelves.

All Cadenza pieces are available in either walnut or American ash and ship fully-assembled.
