Milestone will distribute differentiated versions of the CLO Systems products under Milestone's brand names in Europe (Chief, Sanus). CLO Systems' products include X-arm and T-arm series motorised wall-mounts which are designed for retail, residential and commercial applications.

Paul Feenstra, VP Milestone AV Technologies BV, says, “We believe automated mounting solutions represent an important, emerging product category, and our well-known Chief and Sanus brands will be strengthened by this welcomed addition to our product line.”

Chief and Sanus displayed their new motorised products at the 2008 CEDIA Show in UK. Chief and Sanus' branded motorised products will be available to their dealers by end of August, 2008.
