---

You may know **Dimenco Displays** from their stand at ISE. The **No-Glasses 3D displays**?

Or you may remember their gigantic video wall composed of six 50" Glasses-Free 3D 4K displays in Chuo University in Tokyo. Six (2 vertical x 3 horizontal) 50" 4K displays formed an enormous video wall of 12K resolution.

Now Dimenco Displays is making a clever play on Kickstarter to fund their **No-Glasses 3D TV** in the home for €899.

Watch Dimenco Displays' Mark Dobios as he walks you through the pitch on video.
