

Séura Launches 65-inch Storm Outdoor TV

Written by Marco Attard
29. 07. 2015

Séura adds a 65-inch TV to the Storm Ultra Bright outdoor TV lineup-- the brightest model from the company yet, featuring a 4K/UHD screen and integrated LuminOptics technology.

It produces 630-nit screen brightness and carries a dual-layer anti-reflective screen coating together with UV coated glass to prevent screen washout. An Activ Airflow system keeps internals operating regardless of extreme heat from the sun.

The Séura Storm Ultra Bright is rated for multi-climate use, with a temperature range from -1 to 60 degrees centigrade and an IP56 weatherproof design resistant to rain and snow. A triple-lock seal provides 3 barriers of protection against outdoor elements such as moisture, ice, dust and insects.

The 65-inch TV ships from September 2015.
