

Videotree shows off its most recent waterproof and mirror TV ranges at ISE 2016, with sets available in a wide choice of sizes and finishes, including bespoke framing and either in- or on-wall mounting.

Each Videotree TV features an HD LED screen, IP66 rating against water and dust, and an ultra-thin bezel. The TVs also feature built-in speakers and an array of inputs (including IP connectivity) suiting both residential and professional environments. Display sizes range from 19- to 110-inch.

The company also offers TVs with a choice of 3 different kinds of coloured or reflective mirror glass.

Videotree is currently looking for more global distributors and channel partners.
