Salamander Designs announces an addition to the Chameleon collection-- Low Profile Wall Cabinets, with 30cm depth allowing for easy concealing of AV electronics and wiring in a low profile cabinet.

Available in an array of styles, the floor-standing shallow depth cabinets are designed to be easily affixed to the rear wall for added safety and stability, particularly when using the optional integrated TV mount. Each cabinet is constructed on an extruded aluminium frame enabling easy customisation for just about every applications.

Low Profile Wall Cabinets come in triple- and quad-width sizes with optional integrated 3U vertical racks to accommodate smaller rack-mountable components. Shipping should start from October 2016.
