British TV maker Videotree will showcase a range of weatherproof products at ISE 2017, all featuring toughened glass, double-coated, anti-reflective and high-brightness screens.

Designed to be fully integrated into the surroundings, each Videotree TV is 42mm deep for a sleek and flush finish. The outdoor TVs can also be custom designed, with bespoke framing and installation options as well as optional metal frames for free standing. A patented silent cooling system ensures reliable performance on the summer days, while an optional internal heating system takes care of frost.

Each TV offers a variety of connectivity options, including HDMI, PC, component, RGB, RS232 and IR in/out, making them compatible with all leading home and professional integration system. An IP66 rating ensures full protection against moisture and dust, and all TVs are designed and built in the UK.
