People of Lava unveils its first internet enabled HDTV - running on Google Android. The Scandinavia 'Window to the World' comes pre-loaded with applications including YouTube, Google Maps and internet browser.

One can also download more apps from a built-in Lava App Store.

It comes in either 42", 47" and 55" sizes and includes a wireless keyboard and pointer/mouse.

The manufacturer says the set is made of "a very special material", hard as stone and with a very deep gloss.
