Chief provides a universal mounting solution for large LCD/CRT projectors with the VCMU universal projector mount, featuring steel construction and a simple 3-step installation process.

Micro adjustments (roll, pitch and yaw) allow one to quickly achieve registration, while the universal HBU bracket is compatible with most heavy duty projectors. It has multiple installation options, including flush mounting to ceiling, 1.3cm threaded rods and a 3.8cm NPT extension column.

Other features include integrated cable management (requiring no additional accessories) and quick connect/disconnect for convenient lamp and filter access on most projectors.
