ViewSonic launches the Pro6200 projector-- a 720p resolution projector ideal for budget-conscious customers.

It supports 1080p content (downscaling it to 1280x720 resolution) and carries DLP and BrilliantColor technology, with 2700 lumens brightness and 3000:1 contrast ratio. Inputs come through HDCP-compliant HDMI ports.

The company claims lamp life is around 6000 hours using ECO mode, while a built-in 5W speaker provides plenty of sound.
