Now **Electrosonic's projector lamp website** serves customers throughout Europe and supports the euro (as well as the dollar, the pound, the krona and more).

Electrosonic claims they have "the largest and most comprehensive inventory of OEM lamps."

Also available are OEM-equivalent lamps for xenon and UHP projectors--Electrosonic says they offer savings of up to 50%. The "Sapphire" xenon projector lamps are made in Japan. The "Diamond" UHP lamps use OEM bulbs and offer a 120-day warranty.

Electrosonic's lamp customers receive a 30-day satisfaction guarantee and an enhanced 90-day warranty on their lamp purchases.

Electrosonic also offers its Lamp Replacement Program-- customisable and offers installation and calibration services, and guaranteed availability.

Electrosonic says its volume buying power and knowledge of the lamp businesses allows them to source lamps via many different channels. Special discounts exist for education, government, entertainment and corporate buyers who join Electrosonic's buying group for their vertical sector.
