The Epson PowerLite Home Cinema 2030 is a 2D and 3D 1920x1080 3LCD projector with MHL-enabled HDMI ports-- meaning connects with mobile and streaming devices (such as the Roku Streaming Stick) via Mobile High Link.

MHL outputs video with resolutions of up to 4K and 7.1 surround audio.

The projector features 6 pre-set colour modes, outputs up to 2000 ANSI lumens and carries an integrated 1.2x zoom. Inputs include x2 HDMI/MHL ports, component video and USB.

Built-in speakers allow for easy set-up, while audio out handles the connection of larger sound systems.

3D comes through rechargeable RF glasses (2 pairs included in the package).

The PowerLite Home Cinema 2030 is available from September 2013.
