---

Screen Innovations (SI) launches the Short Throw (ST) screen-- a projection screen designed for exclusive use with bottom-throw, ultra short throw projectors such as the Sony LSPX-W1S 4K projector.

Available in screen sizes ranging from 92- to 120-inch and aspect ratios of 16:9, 17:9 and 16:10, the ST screens feature a proprietary optic screen SI claims offers 180-degree viewing angles and 700% better contrast. Thus it eliminates washed-out images in places with lots of ambient light.

SI also offers an optional LED backlighting kit to further enhance the room with ambient lighting, while the Zero Edge frame style allows installers to fit the screen in any environment.
