Vivitek announces the H1060-- a compact 3000 ANSI lumens projector featuring a contrast ration of 15000:1 and DLP BrilliantColor technology for a 6-segment (GYRWCB) colour wheel.

It handles both 3D and native 1080p content, and is described as ideal for the viewing of both sports and video games. Providing images is an energy efficient lamp Vivitek claims offers up to 10000 hours of use in dynamic eco mode while being positioned on top of the projectors, making bulb replacements easier.

Connectivity comes through dual HDMI v1.4 ports and an MHL input. Other I/O options including audio in and out ports, allowing users to either use the built-in 2W speakers or connect the projector to an external sound system.

The Vivitek H1060 is available now.
