Optoma announces the CinemaX P1 Smart 4K UHD Laser Cinema projector, a compact ultra short throw number able to project a 120-inch image from around 60cm distance featuring a built-in soundbar and an integrated smart TV platform.

The lamp-free laser light engine and DLP XLR chip inside the CinemaX P1 can produce images with 3000 lumens brightness and up to 15000000 contrast with Dynamic Black enabled. A fixed glass lens offers a 0.25:1 throw ratio. The projector also covers REC.2020 and the DCI-P3 wide colour gamut, and is HDR10 compatible. On the audio side, the built-in NuForce 40W soundbar features two full range drivers, two woofers and isolated and ported chambers, and supports Dolby Digital 2.0.

The CinemaX P1 carries Smart+ features, allowing for smart home compatibility via Amazon Alexa and Google Assistant capabilities. IFTTT support provides seamless smart home automation with smart IoT devices, and the software includes access to popular streaming services such as Netflix and Amazon Prime Video. For further content, an integrated 4K media player supports MKV, MP4, Dolby Digital and Dolby Digital Plus.

Setup comes through a SmartFIT iOS/Android companion app complete with auto geometry correction and optional 81-point manual adjustment. An included Bluetooth remote provides control, and HDMI-ARC streamlines setup and reduces cable clutter with 5.1 soundbars. Other ports include x1 HDMI 2.0 (HDCP 2.2), x1 HDMI 2.0 (HDCP 2.2, HDMI-ARC), x1 HDMI 2.0 (HDCP 2.2, side), x1 USB 2.0 (4K media player), x1 USB 2.0 power (side), x1 USB (service), optical S/PDIF out, audio out (3.5 mm, subwoofer compatible) and RJ45.
