Christie's **Mirage Series 3D DLP projector line** has expanded with the addition of six models to bring high performance 3D solutions to new markets.

The new Christie Mirage M Series 3-chip DLP projectors offer complete compatibility with all 3D standards. They're not only aiming these towards the high-end home entertainment and video gaming markets, but also positioning them for the museum, education and rental/staging markets too.

The Christie Mirage M Series lineup includes the DS+6K-M; DS+10K-M; HD6K-M; HD10K-M; WU7K-M and the WU12K-M projectors. The models come in SXGA+ (4:3), HD (16:9) and WUXGA (16:10) aspect ratios and resolutions range from 1400x1050 to 1920x1080 with brightness specs from 6000 to 11,000 lumens!
