---

Vivitek launches its Qumi Q2 3D pocket projector-- not quite a pico, but still comes in a small and lightweight form factor, weighing only 617g.

While small, the LED projector carries Texas Instruments' DLP Link technology and Pico chipset, with native WXGA resolution, 2500:1 contrast ratio and brightness of up to 300 lumens.

Connectivity comes via mini-HDMI, VGA, USB and SD card slot, while audio is via 3.5mm mini-jack and a built-in 1 W speaker.
