Korea's ESPlus announces the Seeser projector at the Korea Electronics Show-- a laser pico projector with an output of up to 25 ANSI lumens at SVGA (800x600) resolution.

Using a laser-based system it requires no focusing, and can produce images of up to 100" in size with projection distance of 20cm to 2m.

Connectivity comes through VGA port and integrated 1seg tuner, and it can also read various file formats from micro SD cards-- with a 1GHz processor running Android 2.2 (Froyo).
