BenQ launches the second generation of the Joybee pico-style mini LED projector-- the Joybee GP2, now with a dedicated iDevice dock.

It produces up to 200 ANSI lumens of brightness, and BenQ says it produces WXGA-resolution images on a 160" screen with 2400:1 contrast ratio and a 1.13 short-throw ratio. Audio comes through either built-in 2W speakers or external speakers via audio out port.

Connectivity also comes through USB (with USB storage compatibility), mini HDMI port and SD card reader.
