FAVI says the E3 LED-Pico projector is geared for gaming, home theatre and business travel use, with WVGA native resolution (854x480) displaying images of up to 110" in size and a 1.59 throw ratio.

It features DLP technology, with 50 lumens of brightness via LED lamp and 1000:1 contrast ratio. Audio comes through either integrated speaker or headphone jack. It plays media on SD/SDHC/MMC cards (up to 32GB) and also has 128MB of internal memory.

The internal battery provides up to 2 hours of playtime (on "eco" mode), extendable by plugging the device into any active USB port.

Ideal as a stocking filler just in time for the holiday season, the package comes complete with remote control, carry case and tripod.
